

MILITARY CONSTRUCTION APPROPRIATION BILL, 1989

JUNE 9 (legislative day, JUNE 8), 1988 —Ordered to be printed

Mr. SASSER, from the Committee on Appropriations,
submitted the following

REPORT

[To accompany H.R. 4586]

The Committee on Appropriations, to which was referred the bill (H.R. 4586) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1989, and for other purposes, reports the same to the Senate with various amendments, and presents herewith information relative to the changes made:

Amount of bill passed by House	\$9,009,795,000
Amount of Senate bill under the House	264,416,000
Total of bill as reported to Senate.....	8,745,479,000
Amount of 1989 budget estimate	9,011,900,000
Amount of 1988 appropriations (adjusted).....	8,500,000,000
The bill as reported to the Senate:	
Under the budget estimate, 1989.....	266,421,000
Above appropriations for fiscal year 1988.....	245,479,000

BACKGROUND

PURPOSE OF THE BILL

The Military Construction appropriation bill provides necessary funding for the planning, design, construction, alteration, and improvement of military facilities worldwide, both for Active and Reserve Forces. It also finances the construction, alteration, improvement, operation and maintenance of all military family housing, including payments against past housing mortgage indebtedness. Certain types of community impact assistance are provided, as well as assistance to members who face loss on the sale of private residences due to installation realignments. The bill is also the source for the U.S. share of NATO infrastructure construction costs.

COMPARATIVE STATEMENT

The fiscal year 1989 budget requests appropriations totaling \$9,011,900,000. The following table displays this request, and compares it with the current fiscal year, the House amount, and the Committee recommendation:

SUMMARY OF THE BILL

The Committee recommends a total of \$8,745,479,000 in new budget authority/appropriations for fiscal year 1989 programs under its jurisdiction. Significant comparisons are noted below:

Fiscal year 1989 budget request: Budget authority	\$9,011,795,000
Committee recommendation for fiscal year 1989: Budget authority	8,745,479,000
Which is—	
Over new budget authority granted in fiscal year 1988 by	245,479,000
Under the budget request by	266,421,000
Under the House bill by	264,416,000

COMPLIANCE WITH SECTION 308 OF THE BUDGET CONTROL ACT

Section 308(a) of the Budget and Impoundment Control Act of 1974 (Public Law 93-344) requires that the Committee include in its report a comparison of its recommendations with levels contained in the First Concurrent Resolution. Appropriate data are reflected below:

BUDGETARY IMPACT OF BILL

PREPARED BY THE CONGRESSIONAL BUDGET OFFICE PURSUANT TO SEC. 308(a),
PUBLIC LAW 93-344, AS AMENDED

[In millions of dollars]

	Budget authority		Outlays	
	Committee allocation	Amount in bill	Committee allocation	Amount in bill
Comparison of amounts in the bill with the Committee allocation to its subcommittees of amounts in the First Concurrent Resolution for 1989: Subcommittee on Military Construction.....	9.012	8.745	8.073	7.983
Projections of outlays associated with budget authority recommended in the bill:				
1989				2.536
1990				2.898
1991				1.650
1992				0.775
1993 and future year				0.673
Financial assistance to State and local governments for 1989 in the bill		0.248		0.030
	Direct loans		Loan guarantees	
Credit authority estimates, fiscal year 1989				

Includes outlays from prior-year budget authority.

Excludes outlays from prior-year budget authority.

COMMITTEE RECOMMENDATION

As previously noted, the Committee is recommending new fiscal year 1989 appropriations of \$8,745,479,000. This is \$266,421,000 under the budget request and \$264,416,000 under House allowances. The basis for this recommendation is contained in the following "Items of special interest," and under the discussions pertaining to each individual appropriation.

ITEMS OF SPECIAL INTEREST

CONFORMANCE WITH AUTHORIZATION BILL

The Committee strongly supports the authorization-appropriation process. However, the Committee has reported the appropriation bill prior to completion of the authorization process. Last year, the Committee did not take action on the appropriation until the authorization conference was complete. As a result, the appropriation bill was folded into the fiscal year 1988 continuing resolution. In order to avoid the potential of enacting the appropriation for fiscal year 1989 on a continuing resolution, the Committee has reported the bill at this time.

The Committee, however, has approved an appropriation which provides \$8,745,479,000, an amount which is within the scope of the House-Senate authorization conference. Therefore, the appropriation bill conforms with the overall funding levels which will ultimately be set by the authorization conferees.

The Committee has approved, however, a number of projects in the Guard and Reserve accounts which were not specifically authorized by the authorization committee. The Committee believes these projects represent high priority activities for the U.S. Department of Defense and has provided appropriate funding. Detail on each change is included at the appropriate place in the report.

BASIS FOR COMMITTEE RECOMMENDATION

The Committee believes the appropriation for military construction and family housing supports one of the most important aspects of the defense budget. Projects included in this bill represent investments which increase force readiness and improve personnel retention.

For the past several years, the Committee has strongly supported the Department of Defense's military construction activities. From fiscal year 1980 through fiscal year 1988, the Congress has provided 78 percent real growth, adjusted for inflation, for military construction. Reflecting the priority Congress places on defense infrastructure investments, real growth for military construction has been increased at a rate which is twice as fast as that for the overall national defense budget.

In the fiscal year 1989 request, the Department reduced the military construction and family housing request by 15 percent from the original amount submitted with the 2-year budget proposal last year. The reduction made by the Department for the military construction and family housing accounts were proportionally deeper than the reductions taken

in the defense budget overall. While military construction was reduced 15 percent, remaining defense accounts were reduced only 10 percent.

The Committee believes the Federal deficit must be reduced and, therefore, supports moderating the rate of growth in the defense budget. However, the Committee believes that the backlog of military construction and family housing is so large, over \$73,000,000,000, that more priority should be placed on military construction investments by the Department in future budgets.

The Committee will, however, continue to make reductions in proposed budget requests to reflect differing congressional priorities. Changes to the request represent the Committee's view that some projects and activities can be deferred until a later date. In some instances, the Committee has rearranged budgetary priorities. In other instances, the Committee has taken issue with specific Department policies.

In general, the Committee has made substantial reductions in the request for spending at military bases overseas. The Committee has also increased the level of funding for the Guard and Reserve. Each specific change is discussed at the appropriate place in this report.

NEW AND CURRENT MISSION ACTIVITIES

The Committee believes that the Department's priority to fund projects associated with new weapons systems and new initiatives is having a detrimental effect on the serious need to provide improvements and investments at existing military installations in support of current mission activities. Since new mission activity is increasingly crowding out budgetary resources available for revitalization, modernization, and readiness, the Committee believes the existing programming philosophy of the Department should be reevaluated.

Beginning with fiscal year 1990, the Committee directs the Department to develop and submit a revitalization plan that details a new strategy for providing funding levels sufficient to care for the pressing needs of existing facility infrastructure. The plan should assure that future requests for funding new mission requirements do not crowd out meeting existing mission needs.

From a practical standpoint, in a period of overall budgetary austerity, the ability to provide an adequate budgetary base for existing mission activities will depend on the Department and each service making a decision to place more relative resources into military construction revitalization while reducing resources available for other DOD activities and appropriation accounts. The Committee is aware that such reprioritization will not be easy to accomplish inside the Pentagon. Nevertheless, the Committee believes that existing mission infrastructure requirements cannot be met without the Department making such difficult choices.

Beginning with the next budget submission, the Committee directs the Department to include an exhibit in the budget justification books that displays projects requested in two separate categories: New mission

and current mission. The Committee further directs that projects cannot be split into both categories; they must be classified either as new or current.

ALLIES BURDEN SHARING

The Committee commends the Department for the creation of a task force on defense burden sharing. This task force was created by Secretary Carlucci in response to section 120 of the Military Construction Act of 1988.

The Committee will monitor the activities of the task force very closely. The language of section 120 is again repeated in the bill accompanying this report. The Committee wants to continue to emphasize the importance placed on securing more equitable burden sharing arrangements with our allies.

Defense expenditures by the United States and our allies cannot be determined by budgetary constraints. The proper level of United States and allied defense spending must be based upon a consensus analysis of the level of the military threat facing the free world.

However, limited budgetary resources are placing substantial pressure on the national budgets of all allied nations, especially the United States. Now, more than ever, our defense alliance relationships are needed to assure proper forums for determining the best and most cost-effective approaches for meeting Western security needs.

Conventional arms control.—The Committee is encouraged by the signing of a treaty eliminating intermediate nuclear weapons and by the potential for progress on strategic arms limitations. However, the Committee believes that defense spending cannot be moderated to any appreciable extent until asymmetrical conventional arms reductions are negotiated.

The Committee believes that the major goal of conventional arms limitations must be a substantial reduction in the Soviet and Warsaw Pact's ability to carry out offensive operations in Western Europe. However, the Committee also believes that conventional arms limitations offer an opportunity for shifting more defense responsibilities, roles, and missions to our European allies.

Therefore, the Committee urges the Department to consult with our NATO allies, prior to entering conventional arms reductions talks with the Soviets and Warsaw Pact, for the purpose of reaching an agreement within the alliance that the United States will receive the greatest share of any negotiated arms and troop reductions.

The Committee does not support a unilateral reduction of United States forces deployed in Western Europe. The Committee believes that the defense of Western Europe should remain a cornerstone of United States defense policy. However, the Committee also believes, given United States defense responsibilities in other parts of the world on behalf of all free world nations, that our more affluent allies should begin to finance more of the relative share of the defense of Europe.

Base rights and base access.—The Committee believes that base rights and base access are tangible measures of burden sharing. Therefore, the Committee is concerned with the recent trends by NATO and Pacific allies toward reducing or placing severe restrictions on U.S. military presence or activities abroad. The Committee is, likewise, concerned with the demands by some allies for unreasonable increases in U.S. foreign aid payments in exchange for base rights or access.

U.S. military forces are deployed abroad for the defense of our allies as well as for the defense of the United States. Therefore, our allies, particularly those which enjoy specific treaty protections by the United States, should be more cooperative in concluding future base rights and base access negotiations.

The Committee also believes that our more wealthy allies should be called upon to help provide new sources of economic assistance to the less wealthy allies which agree to the stationing of foreign military forces on their soil. The provision of foreign aid in this manner to base rights countries would relieve a substantial burden currently placed upon U.S. taxpayers.

The Committee has again included a provision which prohibits the use of Air Force funds to support the relocation of the 401st Tactical Fighter Wing from Spain. The Committee is encouraged that NATO will agree to finance the relocation of this mission using NATO infrastructure funds. However, the new base has not yet been selected and a final agreement on financing has not been reached. Therefore, the legislative provision has been reinserted to again indicate the Committee's strong feeling that the United States should not, alone, bear the cost of base relocations dictated by allied countries.

The Committee believes that whenever any NATO ally seeks to close or relocate bases which perform important missions, the financing of such closures or relocations should be paid by the NATO alliance or the country which has unilaterally demanded such actions.

With regard to the Pacific, the Committee directs the Department of Defense to urge the Government of Japan to provide increased economic assistance to the Philippines. The Committee supports a continued United States military presence in the Philippines, but the Committee believes that Philippine officials are demanding unreasonable increases in United States foreign assistance as rent for Clark and Subic.

United States military facilities in the Philippines are important to deterrence in the Pacific, and they directly support the defense of Japan. The Government of Japan should, therefore, assist the United States in helping the Philippines by providing increased levels of financial assistance.

Due to the uncertainty of base negotiations in the Philippines, the Committee has eliminated most funding for projects in that country. While the Committee supports a continued military presence in the Philippines, and believes that we should continue to support the Philippines efforts to end the Communist insurgency, the Committee is concerned with the apparent negotiating posture of the Philippine Government.

The Committee believes the Department will have to consider moving Clark and Subic missions to other Pacific locations if the Republic of the Philippines seeks unreasonable concessions such as demanding excessive amounts of United States foreign aid in exchange for bases or severely limiting the ability of United States forces to provide regional deterrence. The Committee notes that the cost of moving Clark and Subic is quite high, perhaps \$5,000,000,000 to \$8,000,000,000. However, those investment costs will amortize very quickly, if the cost of maintaining a presence in the Philippines is United States foreign aid reaching \$1,200,000,000 annually, as some Philippine leaders have suggested.

However, the Committee states that once acceptable basing rights have been negotiated with the Philippines, the Committee will entertain supplementals or reprogramming actions to restore the deleted projects.

Other burden sharing initiatives.—The Committee believes many of our allies can assume a greater share of the common defense burden. As the Committee has suggested, conventional arms reductions in Europe could result in our NATO allies becoming more responsible for their own defense. The Committee also believes an opportunity exists for potential reductions in United States forces deployed in South Korea. The Committee believes the Government of South Korea is willing to assume many of the defense missions, especially ground defense, currently assigned to United States forces.

The Committee notes that South Korea is a prospering, growth economy and is in a strong position to begin to take over many of the military missions currently performed by United States forces. Of course, any reduction in United States troop presence in South Korea would not, in any way, diminish the commitment of the United States to the defense of South Korea.

The Committee has also included a general provision which prohibits increasing accompanied tours in Korea. The Committee believes any decision to increase accompanied tours in Korea should be deferred pending a review of future United States base and force structure in that country.

While the Committee understands the reluctance of some allies, and the legal and political constraints on certain countries, to fund projects which support warfighting activities, the Committee believes that more still can be done by our allies to help defray the U.S. burden of defense.

Specifically, the Committee directs the Department of Defense to consult with the allies on the prospect of modifying host nation support agreements to include the financing of construction, maintenance, and operation of family housing, hospitals, and schools which support U.S. military families abroad. The Committee believes the presence of military families provides substantial economic benefits to host countries. Therefore, it is not unreasonable to ask host countries to assist in providing the construction and operations of facilities which support our military families abroad.

If the Department fails to take the initiative on negotiating such agreements, the Committee will consider specific legislative limitations in future bills to encourage such burden sharing arrangements be pursued.

Untied loans to the Soviet Bloc.—The Committee has included a general provision which provides that none of the funds appropriated for new military construction projects can be obligated to make payments to foreign contractors from countries which are making untied, general purpose loans to the Soviet Union, Warsaw Pact, Cuba, Nicaragua, Vietnam, or Libya.

The Committee has learned that several NATO allies and Japan are permitting banking practices which are resulting in billions of dollars annually in such loans being made to potential adversaries of the West. Untied loans, which do not support specific projects or export activities, can be diverted to finance military and political activities throughout the world which add to the defense burdens of the United States and our allies.

Therefore, the Committee has included the general provision to indicate strong opposition to such practices. The Committee also urges the Department to seek cooperation from the Department of State and the Department of Treasury in developing a firm U.S. policy which opposes such activities by our allies. To this end, the Committee calls upon the administration, during the upcoming economic summit in Toronto, to urge our allies to cease the practice of providing untied loans to the Soviet Union and its client states.

The Committee realizes the general provision will have the effect of placing severe restrictions on military construction overseas until allied banking practices, detrimental to the United States and the free world, are corrected. The Committee believes these restrictions are necessary to assure the Department of Defense takes the initiative within the administration to stimulate a consistent and firm policy on this important issue. The Committee will agree, however, to waive the restrictions imposed by this general provision for priority construction certified by the Secretary of Defense to be necessary for the security of the United States.

Alternative force structure.—Last year the Committee directed the Department to undertake a study of alternative force structures which could result in budgetary savings. The Committee agreed to a request from the Joint Chiefs of Staff to defer the report until a net assessment is completed later in the year.

The Committee reiterates its interest in receiving a report on alternative force structures and directs the Department to provide the Committee with such a report immediately upon the conclusion of the net assessment.

Overseas base closures.—The Department has created a commission to study potential military base closures inside the United States. The Committee would support the closure or consolidation of military bases inside the United States when tangible short- and long-term savings can be verified.

The Committee is concerned, however, that the Department's current base closure commission review does not include military bases and activities overseas. The Department maintains hundreds of activities in foreign countries. The Committee continues to believe that a substantial number of overseas bases could be closed with no negative impact on deterrence and forward defense. Therefore, the Committee believes that the base closure commission should consider overseas bases for closure.

Foreign currency fluctuation.—The Committee remains concerned with the excessive burden being placed on the "Military construction" and "Family housing" accounts as a result of foreign currency fluctuation. The Committee has included \$142,000,000 in this bill to the "Army, Air Force, and Defense Agencies military construction" accounts for the purpose of transferring into the "foreign currency fluctuation" [FCF] account to help alleviate the immediate currency fluctuation problem.

The Committee fully recognizes the uncertainties of budget estimating for projects overseas given the wide variance of currency exchange rates which may exist between the time of budget preparation and actual funding obligation. Based on current projections, the overall fiscal year 1989 defense budget is understated by more than \$1,500,000 if today's weak dollar value persists on the overseas financial markets.

The Committee's recommendation is intended to mitigate the need to curtail construction projects. However, the foreign currency fluctuation account should not relieve the financial obligation of our allies which may be brought about through meaningful negotiations to enhance allied burden sharing.

Constructive negotiations are ongoing with the Government of Japan to increase contributions for United States support. To that end, the Committee expects that no funds will be transferred from the foreign currency account to compensate for negative variances in the yen-dollar exchange rate. Rather, these costs should be assumed by the Government of Japan under revised financing agreements. To the extent that such agreements cannot be attained, the construction projects should be canceled in lieu of U.S. cost absorption. The Committee will consider reprogrammings only for emergency situations which may arise.

The Committee has reduced the request for construction of projects overseas to compensate for the burden being created by foreign currency fluctuation. The Committee directs the Department not to delay, defer, cancel, or reduce in scope any project appropriated for construction inside the United States to provide additional resources for transfer to the FCF account. If routine savings are insufficient to meet foreign currency demands, projects funded for construction overseas should be canceled to make up the shortfall.

FCF administration.—Public Law 99-591, title I, section 121 provided legal authority for establishment and operation of the "Foreign currency fluctuation, construction, defense" [FCFCD] account. The primary purpose for establishment and operation of this account was to separate

currency impact from the management of the construction program and to more easily assess the requirement for construction currency fluctuation costs.

Testimony from Department personnel over the past year revealed that the FCFCFCD procedures, as originally implemented by the Department and the services, are adequate with regard to attaining the desired results envisioned by the Congress. The Congress sought to define FCF costs during each fiscal year for each service and defense agency. The current established procedures appear to be meeting this goal.

The Committee would view any attempt by the Department to impose administrative controls on the FCFCFCD account by each separate program year within each service and agency to be micromanagement, unnecessary and counterproductive. The Committee opposes any unnecessary administrative burdens being created and believes that manpower can more efficiently and productively be utilized in the execution of the construction and housing programs. The Department should not seek to create additional burdens when none are required.

FCF budget rates.—The Committee is concerned with the method of pricing projects with regard to the budget rates used for construction and family housing. The fiscal year 1989 budget request was underpriced due to the use of currency rates which reflected a stronger dollar value relative to foreign currencies. The Committee estimates that the fiscal year 1989 overseas construction and housing programs are \$185,000,000 short of the funding level necessary to actually execute those programs.

The practice of underpricing projects overseas cannot be condoned. Beginning with the next fiscal year, the Committee directs that the budget submission for military construction and family housing programs must reflect the most likely dollar conversion rate. The Department should work with the Military Construction Subcommittees on Appropriations, prior to submission of the budget, to determine the most appropriate rate for foreign currency fluctuation.

Overseas construction.—The Committee has been advised of difficulties in accomplishing construction overseas. Areas of concern include obtaining host country approval of projects and materials used in projects, payment of host country taxes on construction, use of host country architects and contractors and, foremost, the required practice of giving millions of dollars for design and construction to host country construction agents, before the required need date, and then waiting up to 2 years to recover funds not used for construction.

The Committee is convinced that a number of improvements could and should be made to the way design and construction are executed overseas. Therefore, the Committee directs the Department to prepare and submit a comprehensive report prior to February 15, 1989, that contains all known impediments to the efficient execution of overseas design and construction and makes specific recommendations for eliminating the problems which currently exist.

Planning and design.—The Committee has provided a total of \$441,693,000 for planning and design for the "Military construction and family housing" accounts during fiscal year 1989. This is a reduction of \$57,470,000 from the budget request. The Committee has reduced funding for planning and design to reflect the Committee's view that construction overseas should be moderated.

GUARD AND RESERVE

The Committee continues to strongly support the Nation's Guard and Reserve Forces. The Committee believes the contribution of the Guard and Reserve to the military total force is an important element in preserving deterrence.

The Committee is concerned that the fiscal year 1989 budget request failed to provide adequate funding levels for Guard and Reserve programs. Therefore, the Committee has increased Guard and Reserve funding by \$185,295,000 to a total of \$658,195,000.

The Committee directs the Department to provide appropriate increases for Guard and Reserve facilities in the fiscal year 1990 budget submission. Until the Department requests sufficient funding for the Guard and Reserve components, the Committee will continue to reduce funding for the active services to provide the resources necessary for Guard and Reserve construction activities.

OTHER ISSUES

Reserve for supplementals.—The Committee has reserved a total of \$250,000,000 for later supplementals to support projects which have been deferred by the Committee for later action and other unanticipated requirements, including the need to provide flexibility in resolving differences between the House and Senate bills in conference.

Reporting requirements.—The Committee directs the Department to continue to provide the Committee with all existing reports and notifications under the practices and thresholds currently in existence. In addition, the Department is directed to display budget justifications and design notifications in the manner directed by the report accompanying the Military Construction Act for Fiscal Year 1988.

The Department is directed to provide a 5-year construction plan for the Caribbean basin by February 15, 1989, and to provide biannual reports on any construction or engineering activity, to be funded from any DOD source, in Zaire or Central America prior to the construction or engineering activity being initiated.

Program, project, and activity.—For purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100-119), the term "Program, project, and activity" will continue to be defined as the appropriation account, consistent with the definition as stated in the fiscal year 1988 conference agreement.

Split funding.—The Committee has approved a general provision included in the House bill which would restore the ability to split-fund construction projects. The Committee directs, however, that the provision applies to fiscal year 1989 only. The Committee will want to closely review the practice during consideration of the fiscal year 1990 budget. The Committee commends the Air Force for planning to discontinue the practice of split funding and expects the other services and agencies to take all necessary steps to eliminate any future requirement for split funding.

Land acquisition.—The Committee has requested the General Accounting Office to conduct a survey of the Department's land acquisition, sale, and transfer practices. Recent reprogramming actions requested by the Air Force have revealed serious underestimates in previously submitted land acquisition projects. The Committee is concerned with the potential for unreasonable escalation of land prices due to the failure of the Department to closely monitor the land acquisition practices of the services. Therefore, the services and the Department are directed to fully cooperate with the GAO during the requested review.

Model Installation Program.—The Department initiated the Model Installation Program [MIP] in 1984. The program's objective is to allow installation commanders greater flexibility in managing resources by waiving certain internal Department of Defense operating procedures. By reducing administrative oversight, allowing more unit-level programming discretion, and allowing the commanders to keep on-base savings generated as a result of management initiatives, the Department hoped to realize more effective installation management without increasing cost.

The Committee concurs with the Department in that there is room for improvement in facility management and applauds the efforts undertaken to identify potential improvements. However, due to the unique nature of planning, budgeting, and executing military construction and family housing projects, very little change to existing operating principles have been or could be accomplished.

Furthermore, decentralization or deregulation of military construction and family housing rules or execution is not acceptable. Such a policy would result in fiscal chaos and reduces the ability of the Congress to effectively perform its proper oversight role.

The Committee directs that future MIP requests that affect appropriations within military construction law be notified to the Committees on Appropriations and may not be implemented until 21 days from the date of receipt by the Committees and without Committee objection.

Biennial budget.—While the Committee supports the concept of 2-year budgeting for most programs in the Department of Defense, the Committee is concerned that the military construction and family housing program does not lend itself to line item budgeting in year 2 when the biennial budget is submitted in the first year.

In the amended fiscal year 1989 request, for example, 44 percent of the projects were different than those proposed in the original fiscal

years 1988-89 request. In addition, 48 percent of the projects in the original request experienced pricing changes. Only 8 percent of the projects remained unchanged in the fiscal year 1989 amended request.

Therefore, it appears clear that line item submittal for the second year of a biennial budget for construction projects is misleading and provides relatively useless information. The Committee, however, believes it useful for the Department to request specific amounts by budget activity for the second year. Such 2-year predictability will improve stability and make for better planning in the program. The Committee, therefore, directs that in the event a 2-year budget is submitted for the fiscal years 1990-91 that only fiscal year 1990 should contain construction line items. Fiscal year 1991 should be displayed only by the general budget activities in the first year and amended to include line items the following year.

Exercise-related construction.—The fiscal year 1988 conference report directed the Department to include specific line items for exercise-related construction in the fiscal year 1989 budget in order to avoid funding such construction within scarce unspecified minor construction funds of each service. The Department failed to comply with this direction and the House has directed that service unspecified minor construction funds be used for exercise-related construction. The Committee disagrees with the House direction primarily because of the failure of the Department to follow the conferees direction.

The Committee does agree with the House that the Department should submit exercise-related construction line items in fiscal year 1990 in the Defense Agencies budget. Any requirement for exercise-related construction during fiscal year 1989 should be resubmitted as a program supplemental budget request under the "Defense Agencies" account. Therefore, no funds are included in this bill for exercise-related construction activities.

Central command project wedges.—The fiscal year 1988 Appropriations Conference Report directed the Department to begin submitting construction project wedges for U.S. Central Command facility requirements. Execution of projects from appropriated wedges cannot commence, however, until the specific projects and locations are subsequently notified to and approved by the appropriate committees.

Construction projects for unified commands are now submitted under the auspices of an individual service. Each service must, therefore, sacrifice other projects in the budget request in order to accommodate unified command requirements. Accordingly, the Committee directs that projects to be built from an appropriated wedge for the U.S. Central Command be fully awarded within 12 months following the date of enactment of the pertinent appropriations law. Unobligated funds in excess of the amount necessary to complete wedge projects awarded in the first year will then become available to the service that received the appropriation to be utilized as sources for reprogrammings. Any project not executed in the first year should be resubmitted in the following budget year until the requirement is satisfied.

Construction agency.—The Air Force budget contains approximately 26 percent of the total request for Department of Defense construction and housing. With the exception of construction in the United Kingdom, the Air Force is allowed to act as construction agent in only rare instances. The Committee believes that there could be financial economies and construction execution enhancements which could be derived from the Air Force's assumption of construction agent responsibilities. The Air Force is directed to submit a report by October 15, 1988, which addresses all aspects of the feasibility of Air Force assumption of agent responsibilities, including changes in existing law. If the result of this analysis is favorable, the Air Force should take action toward submitting proposed changes to law and to the Air Force budget that would permit limited or total Air Force construction agent authority.

Budget execution.—In an attempt to further enhance the ability of the services to rapidly execute construction programs last year's Committee report urged the Office of Management and Budget [OMB] to discontinue the practice of line-item apportionment. OMB has complied with the Committee's request. The Committee further urges OMB to ensure that project line-item deferral or restriction is not conducted at any level higher than the individual service Office of Comptroller. Additionally, the Committee believes that the preparation or use of line-item reporting approval or accounting documents, other than the current DOD exhibit MC-2, should not be involuntarily mandated on the services and Defense Agencies. The Committee directs the Department to submit a report by October 15, 1988, that reflects the action taken toward compliance with the Committee's recommendation.

DOD facilities in West Virginia.—The Committee understands the need to accelerate the military construction program contemplated for West Virginia which has been raised in hearings before the Senate Committees on Armed Services and Appropriations. The matter was the subject of discussion on the Senate floor. This need to accelerate the program has been the subject of correspondence with high-level military officials as well as discussions with the Secretaries of the Army and Air Force. The thrust of these discussions has been that early construction of these various projects will help provide much needed jobs; avoid the costs of inflation associated with delayed construction; and provide modern, updated facilities for use by military personnel in West Virginia. The Committee supports these arguments and directs the Department of Defense to rapidly accelerate the design of projects in West Virginia, and to incorporate them into the fiscal year 1990 President's budget so that they may receive early consideration by the appropriate committees of Congress.

Pentagon Annex.—The Committee has again this year included bill language which prohibits the use of design funds for the initiation of a proposed expansion of the Pentagon. Total cost of Pentagon complex improvements are estimated to be \$515,775,000. The Committee is not unmindful of specific space limitations at the Pentagon but finds the expenditure of over \$500,000,000 to provide additional administrative

space near the existing Pentagon complex to be of a lower priority than operational, training, and housing facilities. The Committee believes it inconsistent to support design or construction of an expensive administrative annex when budget resources are insufficient to take care of the existing backlog of infrastructure requirements at operational military bases worldwide.

The Committee further believes that if space needs at the Pentagon are so critical, consideration should be given to relocating specific functions to other States and localities. In this day of computers, fiber optics, and instantaneous communication, it is not necessary, nor is it wise from a security standpoint, to concentrate DOD's administrative headquarters exclusively in the Washington, DC, area.

Premobilization construction.—The Department has authority which permits the Secretary to authorize up to \$100,000,000 in construction to support a mobilization. Under the premobilization authority, the Secretary, following a determination by the President, can utilize unobligated funds previously appropriated for military construction. The Committee has again included a general provision which requires the Secretary to report to the Committee within 24 hours of invoking the authority. The report shall include a copy of the President's determination, the amount and source of funds to be utilized, and the location and purpose of the construction.

MILITARY CONSTRUCTION, ARMY

Fiscal year 1988 appropriation (adjusted)	\$1,163,790,000
Fiscal year 1989 request (including advance appropriation)	1,144,300,000
House allowance (including advance appropriation)	1,091,630,000
Committee recommendation:	
Appropriation	924,551,000
Prior year advance appropriation	214,000,000
Net	1,138,551,000

The Committee is recommending \$1,138,551,000 for the Army for fiscal year 1989, including an advance appropriation. This amount reflects a decrease of \$5,749,000 to the budget request and an increase to the House proposal in the amount of \$46,921,000.

Specific program changes in the Committee recommendation are discussed below: (See project listing at the end of the report for complete program recommendations.)

AUTHORIZATION DELETIONS

The following projects were requested as part of the budget but were not approved in the reported Senate authorization bill and, therefore, are not recommended by the Committee:

Alaska: Fort J.M. Wainwright: Vehicle maintenance facility	\$9,000,000
Pennsylvania: New Cumberland Army Depot: Energy conservation alterations	1,800,000
Honduras: Upgrade facilities, site 5, Palmerola	3,050,000
Worldwide various: Various worldwide locations: Command and control facility upgrade	7,900,000

DEFERRED PROJECTS

The Committee is deferring a number of projects due to constraints on the budget and the view of the Committee that construction overseas should be moderated. The projects deferred are as follows:

Germany:	
Bad Kreuznach: Facility modernization	\$10,200,000
Baumholder: Organizational vehicle parking	10,800,000
Hohenfels training area:	
Barracks complex	13,600,000
Child development center	1,550,000
Dining facility	2,550,000
Education center addition	510,000
Operations facility	1,750,000
Physical fitness training center	3,050,000
Tactical equipment shop	9,400,000
Training support center	1,250,000
Warehouse	3,300,000

Germany—Continued

Mannheim: Hardstand/facility upgrade	\$14,400,000
Various sites: Range modernization	13,000,000
Vilseck:	
Barracks	1,050,000
Battalion headquarters	1,750,000
Post office	1,200,000
Wiesbaden: Hardstand	2,550,000
Wildflecken: Hardstand	11,400,000
Wuerzburg: Hardstand/facility upgrade	13,800,000

Korea:

Camp Page: Battalion headquarters	670,000
Camp Stanley: Brigade/battalion headquarters	1,200,000

HOUSE DEFERRALS

The House deferred funding for the projects listed below due to lack of House authorization which the Committee believes are fully justified and, therefore, has recommended appropriations as noted:

Alaska:

Fort J.M. Wainwright:	
Consolidated fuel facility	\$2,300,000
Utilities expansion	3,450,000

Arizona: Fort Huachuca: Test and evaluation center

Arkansas: Pine Bluff Arsenal: Binary munition production facility, phase III

New York: U.S. Military Academy: Camp natural bridge modernization

Worldwide various: Various worldwide locations: Intermediate staging facility

HOUSE REDUCTIONS

The House made additional reductions. The Committee has reviewed the projects and believes several are valid requirements. The projects restored are as follows:

Utah: Tooele Army Depot: Ammunition demilitarization facility	\$49,600,000
Germany: Various sites: Wartime host national support	5,000,000

AUTHORIZATION ADDITIONS

The following projects and project addition were not requested in the budget but were approved in the Senate authorization bill, and the Committee supports the projects at the levels noted:

Hawaii: Fort Shafter: NCO Academy	\$8,500,000
---	-------------

Illinois:

Fort Sheridan:	
Alter dining facility	880,000
Child care center	2,400,000

Rock Island Arsenal: Modification, phase V

Savanna Army Depot: Air-condition ammunition center

Virginia: Fort A.P. Hill: Utilities and training facility upgrade

UNBUDGETED/UNAUTHORIZED

The following projects were included by the House but were not requested in the budget and not included in the Senate authorization bill, and therefore, have not been approved by the Committee:

California: Fort Ord: Maneuver training range	\$1,600,000
Illinois: Savanna Army Depot: Transportability test center	1,800,000
Maryland: Aberdeen Proving Ground: Metal work training facility (Project No. 124)	8,600,000
Pennsylvania: New Cumberland Army Depot: Access road	5,300,000
Texas: Fort Bliss:	
Barracks modernization	7,100,000
Tactical equipment shop	3,800,000
Virginia:	
Fort Eustis: Emergency services building	2,500,000
Fort Lee: Petroleum field training facility	4,800,000
Washington: Fort Lewis: Special needs school	10,000,000

COMMITTEE ADDITIONS

The following items, which were not specifically included in the Senate authorization report, were approved by the Committee:

Worldwide unspecified:

 Unspecified worldwide locations:

RDT&E-related construction	\$36,529,000
Foreign currency fluctuation	80,000,000

OTHER CHANGES

Fort Huachuca, AZ, headquarters addition.—The Army is directed to provide \$620,000 through the "Minor construction" account for a new headquarters building addition.

Fort Huachuca, AZ, replacement of destroyed facilities.—The Committee is displeased that the Army neglected last year's report language directing a reprogramming to replace the 23 Fort Huachuca buildings destroyed by the fire. The Army is again directed to expeditiously accomplish this reprogramming during fiscal year 1989 under the authority to construct facilities destroyed by natural disasters, 10 U.S.C. 2854. Further, the Committee believes that the Department should proceed to prioritize the reprogramming and the military construction programs under consideration at Fort Huachuca to address these concerns.

Aberdeen Proving Ground, MD.—The Committee has deferred \$8,600,000 for a metal work training facility at Aberdeen Proving Ground, MD, due to lack of authorization. However, the Committee has reviewed the project and believes it is a valid requirement. Therefore, the Committee would support funding for this project in conference with the House.

Blackstone Army Airfield, Fort Pickett, VA.—The Committee is aware of the requirement to repair Blackstone Army Airfield at Fort Pickett, VA, for use by Active Army units and Reserve components and of the public interest in continuation of joint civilian use of the airfield. The Committee, therefore, directs the Secretary of the Army to initiate im-

mediate design for repair and extension to 7,200 feet of the northeast/southwest runway with appurtenances at Blackstone Army Airfield to support cargo and transport aircraft.

New Cumberland, PA, access road.—The Committee has not included \$5,300,000 as did the House for an access road at the New Cumberland Army Depot. The Committee endorses the House action; however, the project has not been authorized in either the House- or Senate-passed Defense authorization bills. In the fiscal year 1988 Military Construction appropriation bill, the Committee included bill and report language with regard to the importance of this project. Due to budgetary constraints and the lack of matching State funds, the Army did not include the project in the fiscal year 1989 budget request.

The Committee is aware that design for this project has begun. The Committee directs the Army and the Military Traffic Management Command to work with the Pennsylvania Turnpike Commission to develop a financial plan and construction schedule for this project. In order to proceed expeditiously with the construction of an interchange with the Pennsylvania Turnpike and an access road to the New Cumberland Army Depot, the Committee directs that within 90 days after enactment of this bill into law that a report on the status of this project be forwarded to the Committees on Appropriations of the Senate and House. In addition, the Committee further directs that funding for this project be included in the fiscal year 1990 budget request.

The Committee is also interested in the status of the access road into the Tobyhanna Army Depot which was addressed in the Fiscal Year 1988 Military Construction Appropriation Act (Public Law 100-202). A status report on this project should be included as part of the report mentioned earlier in this section. Funding for the project should be included in the fiscal year 1990 budget request.

Hohenfels training area, Germany.—The Committee has denied the budget request to provide facilities and family housing to support the development of the Hohenfels training area in Germany. The Committee does not oppose the development of a new training site in Germany, but believes the host nation, whose forces will also utilize the facilities, should share in the cost of construction and development. Therefore, the Committee directs the Department to seek an agreement with the Federal Republic of Germany to cost share in the Hohenfels training area development.

Walter Reed Army Medical Center.—The Committee notes that the capacity of the Walter Reed Army Medical Center to support patient and staff parking needs is severely limited. This situation materially affects the access which patients have to the Center's medical care. In order to address this situation, the Committee directs the Secretary of the Army to analyze this situation and commence design of a new or expanded parking garage at the Center for submission in the fiscal year 1990 budget request.

Planning and design.—The Committee has reduced the amounts requested for planning and design to reflect the Committee's belief that project construction overseas should be reduced.

R&D related construction.—The Committee has included \$36,529,000 for Army research and development-related construction activities in this bill. In previous years, these funds were included in the Defense appropriation bill. Following is a list of projects to be accomplished with the funds:

RDT&E minor construction (320 projects).....	\$15,529,000
Kwajalein Atoll:	
Shoreline protection.....	4,000,000
Maintenance and repairs.....	2,000,000
Real property maintenance:	
White Sands Missile Range, NM: Road repairs.....	2,300,000
Dugway Proving Ground, UT: Sewage system repairs.....	2,500,000
Aberdeen Proving Ground, MD, and Yuma Proving Ground, AZ:	
Building and utility maintenance and repair.....	5,200,000
Various locations:	
Asbestos surveys and removal.....	1,000,000
Environmental projects.....	4,000,000

MILITARY CONSTRUCTION, NAVY

Fiscal year 1988 appropriation (adjusted).....	\$1,391,111,000
Fiscal year 1989 request.....	1,611,200,000
House allowance.....	1,591,850,000
Committee recommendation.....	1,527,238,000

The Committee is recommending \$1,527,238,000 for Navy and Marine Corps military construction projects in fiscal year 1989. This amount reflects a decrease of \$64,612,000 to the House approved amount and a decrease of \$83,962,000 from the budget request.

Specific program changes reflected in the Committee recommendation are discussed below: (See project listing at the end of the report for complete program recommendations.)

AUTHORIZATION DELETIONS

The following projects were requested as part of the budget but were not approved in the Senate authorization bill and, therefore, are not recommended by the Committee:

California: Naval Air Station, North Island: Maintenance hangar.....	\$5,710,000
District of Columbia: Commandant Naval District, Washington: Administrative office modernization.....	10,000,000
Florida: Naval Aviation Depot, Jacksonville: Aircraft engine processing facility.....	14,180,000
Washington: Naval Station, Everett: Carrier support complex (increment IV).....	52,950,000
Guam: Naval station: Road improvements.....	2,820,000

DEFERRED PROJECTS

The Committee is deferring a number of projects due to constraints on the budget and other reasons. The projects deferred are as follows:

California:

Naval Air Station, North Island: Maintenance hangar	\$5,710,000
Naval Shipyard, Mare Island: Drydock refueling complex	3,950,000
Naval Station, Treasure Island, San Francisco: Industrial support complex	5,000,000
Navy Public Works Center, San Francisco: Electric power system improvements	9,010,000
Personnel support activity, San Diego: Personnel support facility	1,180,000
Submarine training facility, San Diego: Submarine training facility	4,770,000
Florida: Naval Technical Training Center, Pensacola: Administrative facility modernization	2,840,000
Oklahoma: Naval air detachment, Tinker Air Force Base: Naval special warfare unit	38,080,000
Rhode Island: Naval Justice School, Newport: Legal training building	2,060,000
Virginia: Atlantic fleet headquarters support act, Norfolk: Administrative building addition	1,700,000
Italy: Naval support activity, Naples: Command, control, communications, and intelligence [C ³ I] complex	21,600,000
Philippines:	
Navy Public Works Center, Subic Bay:	
Hazardous and flammable storage facility	570,000
Power plant	27,770,000

HOUSE DEFERRALS

The House deferred funding for projects listed below due to lack of House authorization which the Committee believes are fully justified and, therefore, has recommended appropriations as noted:

Alaska: Naval Air Station, Adak: Dependent schools	\$29,000,000
New York: Naval Station: New York: Battleship support complex (increment IV)	33,395,000
Panama: Naval Station, Panama: Special warfare unit	6,200,000

AUTHORIZATION ADDITIONS

The following projects and project increases were not requested in the budget but were approved in the Senate authorization bill, and the Committee supports the projects at the levels noted:

Alabama: Naval Station, Mobile: Ship support complex (increment II)	\$19,745,000
Illinois: Naval Air Station, Glenview: Bachelor enlisted quarters	4,900,000
Louisiana: Naval Station, Lake Charles: Ship support complex (increment II)	5,000,000
Mississippi:	
Naval Air Station, Meridian: Bachelor enlisted quarters upgrade	3,100,000
Naval Station, Pascagoula:	
BEQ rehabilitation	6,000,000
Ship support complex (increment II)	25,700,000
New Jersey: Naval Weapons Station, Earle: Dredging	30,400,000
Pennsylvania: Naval shipyard, Philadelphia: Water distribution system, phase II	8,200,000
Tennessee: NAS, Memphis: Training facility	10,090,000
Texas: Naval Station, Galveston: Ship support complex (increment II)	14,500,000

UNBUDGETED/UNAUTHORIZED

The following projects were included by the House but were not requested in the budget and not included in the Senate authorization bill, and, therefore, have not been approved by the Committee:

California:

Naval air rework facility, Alameda: Aircraft acoustical enclosure	\$8,290,000
Naval Shipyard, Mare Island	
Dredged materials handling facility	2,400,000
Fire station	2,500,000
Naval supply center, Oakland: Gas cylinder storage	1,550,000

COMMITTEE ADDITIONS

The following items, which were not specifically included in the Senate authorization report, were approved by the Committee:

Worldwide various:

Various locations:

RDT&E related construction	\$27,784,000
Shore facilities	50,300,000

OTHER CHANGES

Homeporting.—The Committee continues to provide appropriations to support the Navy's homeporting initiative. The Committee, however, has approved the reduction made by the authorization committee for new funding at Everett, WA, until the legal impediments to project construction are removed. The Committee has also eliminated funding for projects in San Francisco, related to homeporting of the U.S.S. *Missouri*, until local support for the initiative is clarified. The Committee will entertain a supplemental or a reprogramming to support U.S.S. *Missouri* homeporting once a final basing decision is made. The Committee has approved the full amounts authorized for all remaining homeporting locations.

Naples, Italy, headquarters relocation.—The Committee has denied the request to initiate the relocation of Naval activities in Naples, Italy. While the Committee believes the Navy is justified in seeking improvements for 6th Fleet command, control, communication, and intelligence, the Committee believes any new base construction in the region is premature until the future of the cruise missile base at Comiso, Sicily has been determined. The Committee notes that the United States has provided \$220,000,000 for construction of facilities at Comiso to support the GLCM deployment. The Committee believes those facilities already constructed at Comiso are sufficient to support the Naples relocation. However, once the future use of Comiso has been determined, the Committee will be in a position to provide appropriate funding for 6th Fleet support through reprogramming or a supplemental.

Tacamo facilities.—The Committee has deferred \$38,080,000 requested for construction of facilities at Tinker AFB, OK, to support the Navy's E6-A Tacamo mission. This issue will be addressed by the Senate when the bill goes to the floor for debate.

Naval Intelligence Command headquarters, MD.—The Committee has approved \$58,952,000 for a new headquarters to support the Naval Intelligence Command subject to the project being constructed in Suitland, MD.

St. Inigoes, MD.—Last year, the Committee directed the Department to include in the fiscal year 1989 budget request a project supporting upgrading the electrical distribution system at St. Inigoes, MD. The Department failed to include the project as directed by the Committee. The Committee again directs the Department to include \$3,000,000 in the fiscal year 1990 request to initiate this project.

Patuxent River, MD.—The Committee has learned of the severe need for construction of a permanent facility to house the Naval Air Training Center's Test Pilot School at Patuxent River, MD. The Committee directs the Department to include \$5,100,000 in the fiscal year 1990 budget request for this project.

Millington NAS, TN.—The Committee believes that joint use of the airfield at Naval Air Station, Millington, TN, is in the interest of the Navy and the local community. The Committee directs the Navy to review the feasibility of joint use of the airfield and to report to the Committee by November 30, 1988, on plans to accomplish joint use.

Fallon NAS, NV.—The Committee has included \$210,000 in planning and design funds for the Navy to initiate design of four projects to be built at Hawthorne Army Ammunition Plant for facilities to support three Navy Combat Search and Rescue Mission helicopters. The Committee commends the Navy and the Army for this Fallon-Hawthorne joint venture and directs that construction funds be included in the fiscal year 1991 budget request.

The Committee has included a general provision preventing the Navy from entering into agricultural leases of longer than 1 year's duration at NAS Fallon, NV. This provision is to become effective upon passage of this act. The Committee is concerned that allowing long-term leases on this land will jeopardize the negotiations currently underway to reach a comprehensive settlement to the critical water problems facing northwestern Nevada. A moratorium on the initiation of long-term leases will enable the negotiating parties to reach an agreement which may require modification of the irrigation practices on federally owned land surrounding NAS Fallon.

Subic Bay, the Philippines.—The Committee has deleted funding requested for construction at Subic Bay Naval Base in the Philippines. A discussion of this issue is included in the section of the report entitled "Base Rights and Base Access."

Planning and design.—The Committee has reduced the amounts requested for planning and design to reflect the Committee's belief that project construction in many foreign countries should be reduced.

The Committee has included \$300,000 in the "Planning and design" account for initiation of a replacement for a breakwater and for dredging of the San Jose Harbor on Tinian Island in the Northern Marianas Islands. The Committee also directs the Navy to program sufficient

funding in the fiscal year 1990 budget request for these projects. The Committee believes, given the uncertainty of base negotiations in the Philippines, the United States should begin to take actions to be in a position to exercise new basing options in the Pacific, should that become necessary.

The Committee has also provided \$560,000 for initiation of design of a warfare systems integration laboratory at Wallops Island, VA, and directs the Department to request sufficient funds for construction in the fiscal year 1990 budget.

R&D related construction.—The Committee has included \$27,784,000 for Navy research and development-related construction activities in this bill. In previous years, these funds were included in the Defense appropriation bill. Following is a list of projects to be accomplished with these funds:

Trenton, NJ: Naval Air Propulsion Center, install plant automation and motor speed control.....	\$3,465,000
Philadelphia, PA:	
Naval Ship Systems Engineering Command, improved performance, submarine propulsion system, etc.....	1,800,000
Naval Ship Systems Engineering Station, LM2500's gear and water-break.....	200,000
Naval Ship Systems Engineering Station, distributive systems.....	200,000
Naval Ship Systems Engineering Station, electric power distribution	200,000
Naval Ship Systems Engineering Station, electric power generation	400,000
Naval Ship Systems Engineering Station, control system.....	500,000
Memphis, TN: CBI facility, large cavitation channel.....	16,021,000
Minor Construction, RDT&E.....	4,998,000

Shore facilities.—The Committee has included \$50,300,000 to the Department of the Navy to support construction of Shore facilities for the Coast Guard. For the past several years, the Congress has provided funding for Coast Guard activities through appropriations from the Department of Defense. Following is a list of projects to be accomplished with these funds:

Kodiak, AK: Comm station fire restoration.....	\$3,700,000
Petaluma, CA: Training Center Clinic add.....	3,200,000
Cortez, FL: Main building replacement.....	2,200,000
Panama City, FL: Rebuild station.....	2,400,000
Savannah, GA: Hangar construction.....	3,900,000
South Portland, ME: Improve base moorings.....	8,600,000
Toledo, OH: Barracks.....	1,000,000
Yorktown, VA: Reserve center administration building.....	2,700,000
Various locations: Southeast United States, air interdiction shore facilities..	2,600,000
Family housing, quarters:	
St. Ignace, MI, (12 units).....	1,100,000
Cape Cod, MA (restore 25 units).....	1,000,000
Los Angeles/Long Beach (15 units).....	2,300,000
Survey and design (shore facilities).....	3,500,000
Minor AC&I shore construction.....	6,300,000
Storage tank cleanup and support services.....	5,800,000

MILITARY CONSTRUCTION, AIR FORCE

Fiscal year 1988 appropriation (adjusted)	\$1,216,454,000
Fiscal year 1989 request	1,300,600,000
House allowance	1,293,406,000
Committee recommendation	1,227,587,000

The Committee has recommended \$1,227,587,000 for the Air Force in fiscal year 1989. The recommendation amounts to a decrease of \$73,013,000 from the budget request and a decrease to the House recommendation of \$65,819,000.

Specific program changes reflected in the Committee recommendation are discussed below: (See project listing at the end of the report for complete program recommendations.)

AUTHORIZATION REDUCTIONS

The following projects were requested as part of the budget but were not approved in the Senate authorization bill and, therefore, are not recommended by the Committee:

California: Vandenberg Air Force Base: Titan IV launch pad	\$25,000,000
Philippines: Clark Air Base: Flow through shelters, phase I	4,200,000
United Kingdom: RAF Bentwaters: Central post office	800,000
Overseas classified:	
Base 119: F-15 flight simulator training facility	2,050,000
Base 74:	
F-16 egress shop	490,000
F-16 hydrazine facility	260,000

DEFERRED PROJECTS

The Committee is deferring a number of projects due to constraints on the budget and the Committee's view that construction overseas should be moderated. The projects deferred are as follows:

California:	
Castle Air Force Base: Add to jet fuel storage/dispensing facility	\$10,800,000
George Air Force Base:	
Air warrior support complex	3,650,000
F-4 flying training facility	3,400,000
Replace runway	16,500,000
Travis Air Force Base: Alter dormitories	10,400,000
Illinois: Scott Air Force Base: Headquarters U.S. Transportation Command	12,800,000
Texas: Lackland Air Force Base: DLI language training laboratory	12,000,000
Germany:	
Einsiedlerhof: Alter transient dormitory	1,500,000
Hahn Air Base: Alternate combat runway	5,200,000
Ramstein Air Base: Add to/upgrade airman community center	4,800,000
Rhein-Main Air Base:	
Add/alter squadron operations facility	800,000
Aircraft parking	2,000,000
Widen aircraft taxiway	2,200,000
Spangdahlem Air Base:	
Field training facility	2,100,000
Post office	1,300,000
Security police operations facility	1,250,000

Guam: Andersen Air Force Base: Add to/upgrade physical fitness center	\$3,400,000
Italy: Aviano Air Base: Dormitory.....	4,250,000
Japan: Yokota Air Base: Control tower cab.....	500,000
Korea:	
Kunsan Air Base:	
Alter aircraft shelters.....	3,000,000
Dormitories.....	4,400,000
F-16 jet engine maintenance facility	680,000
Vehicle operations and maintenance complex.....	5,000,000
Osan Air Base:	
F-16 aircraft maintenance unit facility.....	2,800,000
Munitions preload equipment storage facility.....	570,000
Netherlands: Camp New Amsterdam: Dormitories.....	5,000,000
Philippines: Clark Air Base:	
Add to/upgrade maintenance control facility.....	940,000
Add/alter fuel system maintenance dock.....	1,500,000
Aeromedical evacuation squadron facility.....	1,500,000
Aircraft operational apron, phase I.....	4,950,000
Combat repair equipment storage facility.....	1,600,000
Dormitories.....	5,200,000
Intelligence facility, phase II.....	2,250,000
Munitions equipment maintenance facility.....	800,000
Security police operations facility.....	3,200,000
Portugal: Lajes Field: Transient dormitory.....	2,200,000
United Kingdom:	
RAF Alconbury: Dormitories.....	2,650,000
RAF Bentwaters:	
Add to/upgrade fire station.....	920,000
Airman community center	2,600,000
Central post office.....	800,000
Security police operations facility.....	1,300,000
RAF Fairford: Add/alter physical fitness center	1,700,000
RAF Lakenheath: Digital European backbone facility.....	440,000
RAF Upper Heyford:	
Combat ammunition control center	930,000
Passive defense equipment storage warehouse.....	500,000
RAF Welford: Fire station.....	870,000
Overseas various: Overseas various: Canadian forward operating LOC/DOB.....	600,000

HOUSE DEFERRALS

The House deferred funding for the projects listed below due to lack of House authorization which the Committee believes are fully justified and, therefore, has recommended appropriations as noted:

Alaska:	
Eielson Air Force Base: Upgrade munition access road	\$7,600,000
Elmendorf Air Force Base: OTH-B operations building.....	17,500,000

HOUSE REDUCTIONS

The House deferred the following projects. The Committee has reviewed the projects and believes they are valid requirements. Therefore, the Committee has restored funding.

Belgium: Kleine Brogel: Alter munitions storage facilities	\$1,900,000
Germany:	
Hahn Air Base: Alter munitions storage facilities	9,900,000
Norvenich Air Base: Alter munitions storage facilities	2,300,000
Korea: Kunsan Air Base: Alter munitions storage facilities	1,300,000
Netherlands: Volkel: Alter munitions storage facilities	2,300,000

AUTHORIZATION ADDITIONS

The following projects were not requested in the budget but were approved in the Senate authorization bill. The Committee supports the projects at the levels noted:

Georgia: Robins Air Force Base: Weapon system support center	\$12,600,000
Michigan: Wurtsmith Air Force Base: Heat plant	5,700,000
New Hampshire: Pease Air Force Base:	
Alter electrical system	8,850,000
Energy plant conversion	500,000
Oklahoma: Altus Air Force Base: Land acquisition	2,300,000

UNBUDGETED/UNAUTHORIZED

The following projects were included by the House, but were not requested in the budget and not included in the Senate authorization bill, and, therefore, have not been approved by the Committee:

Arkansas:

Blytheville Air Force Base:	
Add/alter community religious education facility	\$1,600,000
Organizational maintenance shop	1,050,000
Vehicle maintenance shop	1,100,000
Little Rock Air Force Base: Apron lighting	700,000

California:

Castle Air Force Base:	
Base civil engineering complex	8,600,000
Flood control cost share	1,000,000
Mather Air Force Base: Base flight operations facility	2,300,000

Florida: Eglin Air Force Base Auxiliary Field 9: Consolidated support center	7,300,000
--	-----------

Indiana: Grissom Air Force Base: Traffic management facility	1,850,000
--	-----------

South Carolina: Charleston Air Force Base:

Add/alter child development center	490,000
Add/alter recreation center	590,000

Texas: Brooks Air Force Base: Vehicle maintenance shop	2,750,000
--	-----------

Washington: Fairchild Air Force Base: Survival school bachelor enlisted quarters	8,100,000
--	-----------

COMMITTEE ADDITION

The following items, not specifically included in the Senate authorization report, have been approved by the Committee:

Worldwide various:

Foreign currency fluctuation	\$50,000,000
RDT&E related construction	61,697,000

OTHER CHANGES

Various projects, Arkansas.—The Committee has not included funding for three projects at Blytheville AFB and one project at Little Rock AFB, AR, due to lack of authorization. The House bill includes funding for these projects. The Committee has reviewed the justification for the Blytheville and Little Rock projects and is fully supportive of the need for proceeding with construction. Therefore, the Committee will support these projects in conference with the House.

Davis Monthan AFB, AZ.—The Committee has included \$349,000 in planning and design for the Air Force to initiate design of a replacement aircraft hangar at Davis-Monthan Air Force Base. The Air Force is further directed to include \$4,989,000 in the fiscal year 1990 budget request for construction of this project which would support the Customs Service air drug interdiction effort.

George AFB, CA.—The Committee has denied three projects for George AFB, CA, which support tactical air force training. The Committee has learned this facility is being used by the Air Force of the Federal Republic of Germany. The Committee believes the Department of Defense should seek financial assistance for the construction of facilities which support allied governments. Until such cost-sharing agreements have been concluded, the Committee will not support additional funding for facilities used by allied personnel.

Lackland AFB, TX.—The Committee has denied funding for the Defense Language Institute [DLI] at Lackland AFB, TX. Last year, the conferees on the Military Construction bill directed that any additional funding for facilities at the DLI, which support training of foreign military students, be provided through the appropriate foreign assistance accounts. The Committee believes that the military construction accounts are not appropriate funding sources for projects that support foreign aid activities.

Palmdale, CA.—The Committee has not included funds for construction of an access road to Air Force Plant 42 due to lack of authorization. However, the Committee believes the requirement is both valid and urgent. The Committee directs the Air Force to immediately submit an emergency reprogramming request for the Palmdale Access Road under authority provided in 10 U.S.C. 2803.

Vandenberg AFB, CA.—Due to lack of authorization, the Committee has deferred funding for phase one of new launch facilities to support the Titan IV. However, the Committee supports the efforts of the Air Force to provide a more robust access to space. Therefore, these funds are denied, without prejudice, until approved by the authorization conferees.

In previous years, the Air Force testified that Vandenberg missions will be degraded unless the land use on surrounding properties is compatible. Construction of SLC-7 at Vandenberg Air Force Base raises new questions with regard to potential incompatible development on properties surrounding the base. The Committee directs the Air Force to provide the Committee with a report by December 15, 1988, on the

extent and value of potential incompatible development rights, including a proposal for assuring land use in the surrounding area is fully compatible with SLC-7 mission profiles.

Nellis AFB, NV.—The Committee has included a general provision prohibiting the use of funds in the Military Construction bill from being utilized to support, directly or indirectly, the deactivation, relocation or transfer of the 474th Tactical Fighter Wing from Nellis AFB, NV.

The Committee directs the Air Force to include an upgrade electrical supply and distribution project for Nellis AFB, NV, in the fiscal year 1990 budget at an estimated cost of \$5,300,000. The project will upgrade the electrical supply and distribution system of the main base, the military family housing [MFH] areas, and the proposed new hospital. A reliable and efficient electrical power delivery and distribution system is required to meet present and future electrical power requirements in order to adequately support the base and flying mission.

The current electrical power supply and distribution system has not been improved to accommodate increased demands from normal growth and beddown of Red Flag, F-16 aircraft, combat support center [CSS], Department of Energy aerial measurements operations, and Detachment 3 Electronic Security Command [ESC].

If not provided, an inadequate electric power delivery and distribution system will continue to seriously impair current and planned mission support. Critical base facilities will continue to require costly equipment repairs and suffer operational setbacks due to power outages. Significant power cost savings will not be realized if the primary source power to Nellis Air Force Base is not upgraded to 69 kV and main base, MFH, and hospital power is not consolidated into one switching station.

ATB construction.—The Senate authorization included a \$50,000,000 general reduction to projects at Whiteman AFB, MO, which support the beddown of the advanced technology bomber (B-2). The Committee believes such a large reduction would have a severe impact on this important beddown and has reduced the reduction to only \$10,000,000.

Rail garrison MX.—The Committee has included the entire budget request for construction of facilities at F.E. Warren AFB, WY, to support the rail garrison basing mode for the MX missile system. However, the Committee directs that none of the funds appropriated for this purpose be obligated until the Committee has been provided a report by the Secretary of Defense after February 15, 1989, indicating that the rail garrison basing mode has been certified by the President as the policy of the U.S. Government.

Alter munitions storage facilities, various locations.—The Committee has approved the entire budget request for alteration of munitions storage facilities at various locations in Europe. The Committee believes that NATO will agree to provide funding for these projects. Therefore, these funds are approved with the understanding that the Department will seek recoupment from NATO at the earliest possible date. Fur-

thermore, these funds may not be obligated until the related report required in the Fiscal Year 1988 Military Construction Act has been satisfied.

Cruise missile bases.—The Committee is concerned that the Department of Defense has not determined the future use of cruise missile bases which will be vacated under the terms of the INF Treaty. Therefore, the Committee directs the Secretary of Defense to provide a report to the Committee by March 15, 1989, which outlines the future use of these installations. The Committee notes that hundreds of millions of dollars have been invested in these facilities and urges that steps be taken to assure these substantial investments are not wasted.

Hahn AB, Germany.—The Committee has denied funding for \$5,200,000 for construction of an alternate runway at Hahn AB, Germany. The Committee directs the Department to seek host nation support for this project.

Aviano AB, Italy.—The Committee has denied funding for two projects at Aviano AB, Italy, including a school project funded under Defense Agencies. The Air Force is directed to provide the Committee with a long-term facilities and mission plan for the base by March 1, 1989.

Clark AB, Philippines.—The Committee has denied \$26,140,000 of the \$33,140,000 requested for construction at Clark Air Base in the Philippines. Funding from the "Family housing" account has also been denied. A discussion of this issue is included under the section of the report entitled "Base rights and base access."

Canada, forward operating locations.—The Committee has denied \$600,000 to initiate construction of forward operating locations [FOL's] and disbursed operating bases [DOB's] in Canada. The Committee believes any projects related to this initiative should be funded through the NATO infrastructure account, as were the colocated operating bases [COB's] in Europe.

Planning and design.—The Committee has reduced the amounts requested for planning and design to reflect the Committee's belief that project construction overseas should be reduced.

Scott AFB, IL.—The Armed Services Board of Contract Appeals [ASBCA], by unanimous decision dated April 22, 1988, ruled that the Air Force should compensate a contractor for performance of renovation and improvements to 388 units of Wherry housing at Scott AFB, IL. The Committee understands the Air Force has failed to comply with the ASBCA decision. Therefore, the Committee directs the Air Force to expedite the resolution of this matter and provide the Committee with a report of action taken by August 1, 1988.

Section 122.—Last year the Committee approved section 122 in the Military Construction Appropriations Act of 1988. This provision requires the Air Force to maintain legislative liaison to the Senate and House Subcommittees on Military Construction appropriations and budgetary and fiscal management of the military construction and family housing appropriations in a manner identical to the method em-

ployed as of September 30, 1986. This provision was included by the House in the fiscal year 1989 bill. The Senate concurs with the action of the House. As a further clarification of the intent of section 122, the Committee indicates that the Air Force should maintain the liaison and budget functions described in the general provision under the Air Force Deputy Comptroller for Budget within the Secretary of the Air Force Comptroller organization as those functions are currently maintained. Further, the Air Force should maintain no less than the same level of manpower authorizations currently authorized and personnel filling these slots should not be involuntarily separated or transferred.

RDT&E related construction.—The Committee has included \$61,697,000 for Air Force research and development minor construction and RDT&E-related construction activities in this bill. In previous years, these funds were included in the Defense appropriation bill. Following is a list of projects to be accomplished with the funds:

Williams AFB, AZ:	
Full field of view dome display development	\$450,000
Fighter lead-in trainer	125,000
AFFTC Edwards AFB, CA: MSC uninterruptable power system	150,000
Edwards AFB, CA:	
ATF DEM/VAL facilities	9,800,000
Construction C-17A airdrop test complex	4,730,000
Cape Canaveral AFS, FL:	
Alter integrate-transfer-launch [ITL] facilities	7,100,000
Medium launch vehicle program	9,000,000
Solid rocket motor upgrade	4,000,000
Wright Patterson AFB, OH:	
Locate/construct site for airborne imagery transmitter [ABIT]	250,000
Equip install of CRAY X-MP/48 computer system	250,000
Install combustion air heaters and exhaust system	300,000
Modify sensor/system dynamic analyzer	200,000
Install equipment for RASPL relocation	250,000
Arnold AFS, TN:	
Test facility plant automation	197,000
Facility computer and network improvement	2,300,000
Upgrade arc heater	302,000
Various locations: Peacekeeper rail garrison basing	13,100,000
Minor construction: RDT&E	9,193,000

MILITARY CONSTRUCTION, DEFENSE AGENCIES

Fiscal year 1988 appropriation (adjusted)	\$551,246,000
Fiscal year 1989 request	712,000,000
House allowance (including rescission)	747,952,000
Committee recommendation:	
Appropriation	537,972,000
Rescission	
Net	537,972,000

The Committee has recommended \$537,972,000 for projects considered within the "Defense agencies" account. The amount recommended reflects a decrease of \$209,980,000 to the House figure and a decrease of \$174,028,000 to the budget request.

Specific program changes reflected in the Committee recommendation are discussed below: (See project listing at the end of the report for complete program recommendations.)

AUTHORIZATION DELETIONS

The following projects were requested as part of the budget but were not approved in the Senate authorization bill and, therefore, are not recommended by the Committee:

Conus classified: Classified location: Classified project.....	\$20,000,000
Guam: Naval Station: Fleet hospital support facilities.....	1,600,000

DEFERRED PROJECTS

The Committee is deferring a number of projects due to constraints on the budget. The projects deferred are as follows:

California: Hunters Point annex, Treasure Island Naval Station: Medical/dental facility.....	\$5,000,000
Germany:	
Downs barracks: Dispensary/dental clinic.....	4,200,000
Erlangen: Elementary school addition.....	3,890,000
Geissen: Middle school addition.....	2,197,000
Hahn Air Force Base: Composite medical facility addition/alteration....	18,500,000
Rhein-Main Air Base: Dispensary/dental clinic replacement.....	14,200,000
Smith barracks: Dental clinic replacement.....	5,100,000
Wildflecken:	
Dispensary/dental clinic.....	4,800,000
Elementary and middle school additions.....	2,752,000
Italy: Aviano: Elementary and high school additions.....	9,450,000
Japan: Yokota Air Base: DCA-NWP communications operations center.....	785,000
Korea:	
Pusan: Elementary and high school additions.....	1,980,000
Seoul:	
Elementary school addition.....	7,332,000
Hospital replacement.....	55,000,000
Taegu Air Base: Medical/dental clinic replacement.....	4,400,000
Netherlands: Brunssum: AFCENT International School.....	8,863,000
United Kingdom: Royal Air Force Lakenheath: Composite medical facility addition/alteration.....	41,000,000

HOUSE REDUCTION

The House reduced funding for the project listed below due to House authorization. The Committee believes the entire amount is fully justified and, therefore, has recommended an appropriation as noted:

Colorado: Falcon Air Station: National test facility.....	\$72,500,000
---	--------------

AUTHORIZATION ADDITIONS

The following projects were approved in the Senate authorization bill, and the Committee supports the projects at the levels noted:

Georgia: Robins Air Force Base: Occupational health care clinic replacement	\$3,600,000
Maryland: Fort Meade: Defense access road	12,000,000
New Mexico: Kirtland Air Force Base: Dental clinic	2,550,000
Oklahoma: Fort Sill: Hospital, phase II	27,000,000

OTHER CHANGES

Medical facilities, various locations.—The Committee has denied funding for a number of overseas medical facility projects. The Committee is concerned that Defense Medical Facilities Office [DMFO] budget submissions do not receive an appropriate review by the construction agencies of the individual military services prior to submission to the Congress for funding. Therefore, the Committee directs that all future requests for medical facility construction be included in the budget request of each service. The DMFO should continue to be the lead agency for departmentwide medical policy. However, the Committee believes that, as funds available for military construction begin to shrink in future years, medical facility projects should compete for funding within the priorities set by the services themselves.

Aberdeen Proving Ground, MD, hospital addition.—Last year the Committee directed the Department to request funding in fiscal year 1989 for a 40-bed hospital addition at Aberdeen Proving Ground. No budget request was submitted. The Committee reiterates its strong interest in this project and directs the Department to immediately proceed with design of the project and to include construction funds in the fiscal year 1990 budget request.

Nellis AFB, NV, hospital replacement.—The Committee is aware that the Department of the Air Force and the Veterans Administration are currently planning the construction and operation of a jointly funded and operated hospital at Nellis AFB, NV. Design is expected to be mature enough to permit the project's inclusion in the fiscal year 1990 budget request for each agency.

The Committee strongly supports this initiative. The project responds to acute needs for a replacement facility for the existing Air Force hospital at Nellis Air Force Base, and the total lack of any inpatient care facility for veterans in the Las Vegas area. In submitting this project for construction authorization next year, the Committee requests that the Secretary of the Defense include details of the memorandum of agreement between the Department and the Veterans Administration for the sharing of the staffing and operating costs of this joint facility.

Falcon Air Station, CO, SDI national test facility.—The Committee has included the full budget request to finish construction of a national test facility for the SDI program. The Committee has included a general provision, the language of which was also included in the fiscal year 1988 continuing resolution, which provides that the NTF cannot be used to support an early deployment of SDI.

Aviano AB, Italy.—The Committee has denied funds for high school construction at Aviano AB, Italy. This action is discussed under the Military construction, Air Force section of this report.

AFCENT School, The Netherlands.—The Committee has denied funding for the U.S. share of construction of a new international school to support children of NATO personnel. The Committee has withheld appropriation of these funds until allied countries agree to share in the cost of funding joint-use facilities at George AFB, CA, and Lackland AFB, TX. These two projects are discussed under the Military construction, Air Force section of the report.

Rescission.—The Committee disagrees with the rescission of fiscal year 1988 funds totaling \$29,548,000 recommended by the House. The Committee directs that up to \$10,000,000 of these previously appropriated funds be utilized as a reprogramming source to meet unanticipated requirements of the National Security Agency and that remaining amounts be transferred to the "Research, development, test, and evaluation, Air Force" fiscal year 1988 appropriation.

Planning and design.—The Department is directed to initiate design of a remote space sensing laboratory and to provide the Committee with a report by December 1, 1988, with regard to plans for proceeding with construction.

The Committee has included up to \$1,000,000 to initiate planning and design of an aerospace medicine facility at Grand Forks, ND.

NATO INFRASTRUCTURE

Fiscal year 1988 appropriation (adjusted)	\$373,000,000
Fiscal year 1989 request	502,100,000
House allowance	502,100,000
Committee recommendation	492,000,000

The Committee recommendation for the "NATO infrastructure" account is \$492,000,000. This appropriation provides the U.S. share of commonly funded NATO infrastructure in Europe. The Committee recommendation reflects a decrease of \$10,100,000 from the budget request as recommended in the Senate-passed authorization bill.

The Committee strongly supports the NATO infrastructure program as the only pure burden sharing program in the Military Construction bill. The Committee directs that the budget request for fiscal year 1990 and subsequent years must reflect in the budget justification material the positive or negative dollar impact due to changes in the NATO international accounting unit [IAU]. The justification must also include a listing of all infrastructure projects to be funded in the associated NATO slice.

MILITARY CONSTRUCTION, GUARD AND RESERVE COMPONENTS

Fiscal year 1988 appropriation (adjusted)	\$572,833,000
Fiscal year 1989 request	472,900,000
House allowance	517,572,000
Committee recommendation	658,195,000

The Committee recommends \$658,195,000 for military construction projects for the Guard and Reserve components. This amount is \$185,295,000 above the budget request and \$140,623,000 above the House recommendation.

Individual component recommendations are as follows:

Component	1988 adjusted	Budget request	House allowance	Committee recommendation
Army National Guard	\$181,905,000	\$138,300,000	\$163,500,000	\$248,414,000
Air National Guard	147,791,000	147,500,000	152,170,000	177,728,000
Army Reserve	93,300,000	79,900,000	81,702,000	87,303,000
Naval Reserve	72,537,000	48,400,000	54,400,000	72,075,000
Air Force Reserve	77,300,000	58,800,000	65,800,000	72,675,000

SUPPORT FOR GUARD AND RESERVE

The Committee reiterates statements earlier in this report that more emphasis should be placed on the Guard and Reserve components. The Committee notes that the backlog of Guard and Reserve construction totals more than \$6,500,000,000. Therefore, the Committee directs the Department to increase the budgeted amounts for Guard and Reserve in the fiscal year 1990 budget request.

PROGRAM CHANGES

Army National Guard, indoor ranges.—The Committee has added \$15,000,000 to initiate a program to upgrade the Army National Guard's 654 indoor ranges that have been declared unsafe and in need of rehabilitation. The Committee also directs the Department to include funds to continue this program in the fiscal year 1990 budget request.

Army National Guard, armory storage buildings.—The Committee has included \$10,000,000 to continue a program of construction of armory storage buildings. The Committee directs the Department to include funds to continue this program in the fiscal year 1990 budget request.

Air National Guard, reprogrammings.—The Committee has included funds for three projects previously approved by the Committee for reprogramming. The projects are \$3,300,000 for an aircraft parking ramp at Yeager Airport, Charleston, WV; \$3,500,000 for alterations to the aircraft parking apron at Kulis Air Guard Base in Anchorage, AK; and \$2,000,000 for an aerial port training facility at Allen C. Thompson Field in Jackson, MS. The House failed to approve the reprogramming request, due to lack of authorization. The Committee has, therefore, included these funds in the fiscal year 1989 bill because, in the view of the Committee, these projects represent legitimate requirements that have been fully validated by the Air National Guard.

Air National Guard, field training sites.—The Committee directs the Secretary to submit a report by January 15, 1989, on the 5-year plan for the development and possible expansion of field training sites. The report should include, but not be limited to, a joint operations area at Fort Huachuca, AZ, and also Walker AFB, NM. The Committee expects that the findings of this report will be reflected in the budget request for fiscal year 1990.

Minot, ND, Guard and Reserve Armory.—The Committee has included \$7,920,000 for a National Guard Armory/Armed Forces Reserve Center at Minot, ND. With the planned activation in the near future of

a number of Army and Air Guard units at Minot, there is an urgent need for a new armory. The new facility will also permit the Army Reserve and Air Guard to move from leased facilities.

Edgewood Arsenal, MD.—The Committee has included a general provision which prevents the use of funds in the bill from being used to transfer any equipment, operation, or personnel from the Edgewood Arsenal to any other facility.

Clovis, NM, Armory.—The Committee has included \$100,000 in the "Army National Guard planning and design" account for design of an armory in Clovis, NM.

Mississippi Air National Guard.—The Committee increased the Air National Guard's planning and design account to accommodate the design of the following projects to be submitted in the fiscal year 1990 budget request: Gulfport, MS, Tac Cont Sq operations facility; Key Field, MS, aircraft maintenance facility; Thompson Field, MS, composite medical training/security police operations building; and Thompson Field, MS, base civil engineering facility.

In addition, the Committee recommends renovation of the 255th's existing facility to house the 173d Civil Engineering Squadron at Gulfport, MS.

Strategic airlift.—The Committee strongly supports the transfer of strategic airlift missions and assets from the Active Air Force to the Guard and Reserve. The Committee believes the Guard and Reserve are uniquely qualified to perform most, if not all, the Nation's strategic airlift missions. However, the Committee is concerned that the Active Air Force continues to resist providing additional C-141 aircraft to the Guard for the purpose of carrying out the strategic airlift mission. Therefore, the Committee has included in the bill a legislative prohibition which prevents the use of funds appropriated to the Air Force Reserve from being used to support standing-up new C-141 or proposed C-5A strategic airlift units until the committees have been advised, in a report by the Secretary of the Air Force on February 28, 1989, of specific plans to provide additional C-141 aircraft to the Air National Guard. The Committee regrets the necessity of including this provision but believes the Air National Guard must be allowed to share the strategic airlift mission with the Air Force Reserve.

Marine Corps Reserve, AV-8B facilities.—The Committee has included sufficient funds to the Marine Corps Reserve to initiate design of facilities to support converting two A-4 squadrons to the AV-8B aircraft. The Committee strongly supports the modernization of the Marine Corps Reserve's ground attack mission.

Deficiencies.—The Committee recommends \$6,200,000 for the Air National Guard, \$6,200,000 for the Navy Reserve, and \$8,400,000 for the Air Force Reserve to correct deficiencies in the current funded positions of these components. The construction program for these components is relatively small, severely limiting the ability to absorb cost variation in contract bids. It is the Committee's view that deficiency allowances are now needed to avoid cancellation of projects and other disruptions in the ongoing program.

PROJECT ADDITIONS

The following projects were not requested in the budget but represent high-priority activities. The Committee supports the projects at the levels noted:

Army National Guard:

Alabama:	
Auburn: Armory	\$937,000
Fort McClellan: Unit training equipment site.....	459,000
Montgomery: Combined support maintenance shop.....	3,652,000
Tuskegee: Armory.....	651,000
Alaska: Fort Richardson: Armory	25,000,000
Arkansas: Stuttgart: Armory	936,000
Florida: Camp Blanding: Bachelor officer quarters.....	886,000
Georgia: Metter: Armory	823,000
Illinois: Urbana: Armory	800,000
Michigan:	
Taylor County: Armory	2,353,000
Ypsilanti: Armory complex.....	3,091,000
Mississippi:	
Camp McCain: Unit training equipment site expansion/upgrade...	600,000
Camp Shelby: Training area complex	9,500,000
Missouri: Jefferson City: U.S. property and fiscal officer office.....	2,036,000
Nevada: Stead: Aviation support facility	1,115,000
New Hampshire: Concord: OMS addition	344,000
New Mexico:	
Central: Armory	1,070,000
Grants: Armory	800,000
Las Vegas: Armory	1,313,000
Santa Rosa: Armory	800,000
Tucumcari: Armory	807,000
North Dakota: Minot: Armory-Reserve center.....	7,920,000
Ohio: McConnelsville:	
Armory	4,669,000
OMS shop	1,153,000
Training site	914,000
Tennessee: Trenton: Armory	1,500,000
Virginia: West Point: Armory	1,420,000
West Virginia: Buckhannon: Property office addition	325,000
Wisconsin: Volk Field: ACMI range support facility	1,500,000
Worldwide unspecified: Unspecified worldwide locations:	
Armory storage buildings	10,000,000
Indoor range modernization.....	15,000,000
Air National Guard:	
Alaska: Anchorage: Kulis.....	3,500,000
Florida: Camp Blanding: Site preparation and utilities.....	800,000
Maine: South Portland Air Force Station: Communication/electrical training facility.....	988,000
Mississippi:	
Allen C. Thompson Field: Aerial port training/age facility	2,000,000
Key Field:	
CE facility.....	1,450,000
Medical administration facility	1,000,000
	250,000
Nevada: Reno IAP: Dispensary	
West Virginia:	
East West Virginia Regional Airport (Martinsburg): Alter vehicle maintenance.....	200,000
Yeager Airport (Charleston): Aircraft parking ramp/holding pad ..	3,300,000

Air National Guard—Continued

Wisconsin:	
Mitchell Field:	
Support facilities.....	\$2,970,000
Taxiway.....	2,470,000
Deficiency allowance.....	6,200,000
Army Reserve:	
Alabama: Gordo: 60 member reserve center.....	1,547,000
New Hampshire:	
Concord: Land acquisition.....	150,000
Lanconia: Land acquisition.....	350,000
Manchester: Hardstand.....	125,000
West Virginia:	
Parkersburg: Reserve center.....	3,306,000
Morgantown: Land acquisition.....	150,000
Beckley: Land acquisition.....	175,000
Navy Reserve:	
Illinois: NAS Glenview: Bachelor enlisted quarters.....	4,900,000
Mississippi: Gulfport: Seabee center.....	6,500,000
New Hampshire: Manchester: Reserve center.....	5,300,000
Deficiency allowance.....	6,200,000
Air Force Reserve:	
Indiana: Grissom Air Force Base: A-10 facility.....	4,800,000
Deficiency allowance.....	8,400,000

FAMILY HOUSING

Fiscal year 1988 appropriation (adjusted).....	\$3,196,746,000
Fiscal year 1989 request.....	3,269,365,000
House allowance.....	3,265,950,000
Committee recommendation.....	3,164,501,000

FAMILY HOUSING OVERVIEW

The Committee feels strongly that adequate housing is important for the quality of life of our service people. Therefore, the Committee continues to support new construction and new initiatives to upgrade and improve family housing opportunities for our service personnel.

The Committee is concerned, however, that the Department may not be paying enough attention to the potential for affecting cost reductions in the operations of family housing.

At the request of the Committee, the General Accounting Office has found that significant opportunities exist for reducing excessive utility costs. In fiscal year 1989, alone, the Department requested almost \$700,000,000 for utility payments. GAO indicates that military installations are making no attempt to monitor energy usage or to identify high energy consumers. In fact, GAO indicates, few family housing units are individually metered.

The Committee believes that the Department should initiate an incentive program designed to reduce the cost of providing utility service to military family housing units. The Committee directs the Department to report to the Committees on Appropriations by March 15, 1989, on the measures to be taken to reduce the cost of providing utility service to family housing.

Construction improvements.—The Committee is concerned that the current funding pattern for construction improvements to existing family housing will result in uneven improvements to family housing units which will vary from service to service. The Committee believes family housing should be substantially uniform for each service. Therefore, in future budget requests the Committee will be inclined to provide each service with a limited funding level based on the number of units in the existing inventory. The Committee urges the Department to work with the services to assure a more uniform policy and funding level with regard to construction improvements.

Contract cleaning.—The Committee has learned that the Department of Defense has extended the practice of contract cleaning for vacated quarters to all family housing units worldwide. The Committee has further learned that the practice may be undertaken without regard to cost and that, as a result, contract cleaning could increase Federal spending by \$34,000,000.

The Committee supported a limited test of contract cleaning overseas in those instances where a savings to the Government could be documented. The Committee has never granted the Department authority to extend the test or to waive the requirement to document savings.

Therefore, the Committee has included a general provision which prohibits the use of appropriated funds to support contract cleaning. The Committee will consider restoring contract cleaning only when the Department creates a congressional notification procedure which certifies that each contract entered into will result in a net savings to the Government.

General officers quarters.—The Committee continues to be concerned with the large number of out of cycle notifications to provide maintenance and repairs over \$25,000 to general officers quarters. Last year, the Committee directed that all out of cycle notifications must be certified by the appropriate service Secretary. The purpose of the Committee's requirement for service Secretary certification was to reduce the number of such notifications and to provide better justification for projects to be undertaken.

The Committee is concerned that a large number of out of cycle notifications continue to be submitted, often without the specific certification of the service Secretary. Therefore, the Committee will no longer accept out of cycle notifications for maintenance and repair of general officer quarters. Only those requests which relate to emergency safety or security measures are to be submitted out of cycle. Henceforth, all general officer family housing maintenance and repair projects must be included in the President's annual budget submission.

Installment purchase.—The Committee agrees with the House endorsement of installment purchase of family housing. The Committee has approved the House general provision providing for a pilot program, to be requested by the Department in fiscal year 1990, and directs the Department to work with the Office of Management and Budget to resolve any potential scorekeeping concerns.

Family housing leasing reporting requirements.—For domestic leases, the Department is directed to report quarterly on the details of all new domestic leases entered into during the previous quarters which exceed \$10,000 per unit per year, including certification that less expensive housing was not available for lease. For foreign leases, the Department is directed to: perform an economic analysis on all new leases or lease/construct agreements where more than 25 units are involved; report the details of any lease exceeding \$20,000 per unit per year, 21 days prior to entering into such an agreement; and base leasing decisions on the economic analysis. These reports are not necessary for previously approved leases being renewed unless renewal costs exceed the limit.

FAMILY HOUSING, ARMY

Fiscal year 1988 appropriation (adjusted)	\$1,540,711,000
Fiscal year 1989 request	1,528,272,000
House allowance	1,510,371,000
Committee recommendation	1,510,102,000

The Committee recommends \$1,510,102,000 for family housing, Army in fiscal year 1989 which is \$18,169,000 below the budget request and \$269,000 below the House recommendation. Specific details are included in the tables at the end of the report.

NEW CONSTRUCTION

The Committee has approved funding for new construction totaling \$179,778,000 as listed below:

Location/project	Requested	Recommended
New construction:		
Alaska: Fort Wainwright: 150 units	\$27,000,000	\$27,000,000
California: Fort Irwin: 263 units	24,000,000	24,000,000
Hawaii:		
Helemano: 100 units	11,400,000	11,400,000
Schofield barracks: 40 units	4,450,000	4,450,000
Kansas: Fort Leavenworth: 272 units	20,000,000	20,000,000
New York: Fort Drum: 100 units	10,000,000	10,000,000
Germany: Hohenfels: 88 units	8,400,000	8,400,000
Construction improvements	72,300,000	72,300,000
Planning and design	10,628,000	10,628,000
Total, construction	188,178,000	179,778,000

OPERATION, MAINTENANCE, AND LEASING AND DEBT PAYMENT

The Committee has provided \$1,330,324,000 for operating expenses leasing and maintenance of real property and debt payment, a reduction of \$9,769,000 from the budget request.

Hohenfels, Germany.—The Committee has denied the request for 88 units. This issue has been discussed earlier in the report under "Military construction, Army."

New construction.—The Committee is concerned that the Army may be considering plans to deemphasize new construction of family housing. The Committee would view such a retrenchment as having a nega-

tive impact on troop morale and retention. Therefore, the Committee urges the Army to continue to program sufficient funds for a robust new construction program.

FAMILY HOUSING, NAVY

Fiscal year 1988 appropriation (adjusted)	\$756,941,000
Fiscal year 1989 request	795,428,000
House allowance	795,428,000
Committee recommendation	764,433,000

The Committee recommends \$764,433,000 for family housing, Navy in fiscal year 1989 which is \$30,995,000 below the budget request and the House allowance. Specific details are included in the tables at the end of the report.

NEW CONSTRUCTION

The Committee has approved funding for new construction totaling \$211,445,000 as listed below:

Location/project	Requested	Recommended
New construction:		
California:		
Marine Corps air ground combat center: Twenty-nine Palms: 100 units	\$9,470,000	\$9,470,000
Marine Corps Air Station: El Toro:		
100 units	8,660,000	8,660,000
80 trailer pads	1,460,000	1,460,000
Marine Corps base:		
Camp Pendleton:		
Access roads	970,000	970,000
332 units	27,540,000	27,540,000
Naval complex: San Diego: 356 units	31,830,000	31,830,000
Naval Station: Long Beach: 300 units	26,110,000	26,110,000
Public works center: San Francisco: 300 units	35,736,000	330,000
District of Columbia: Naval District: Washington		
Georgia: Naval Submarine Support Base: Kings Bay:		
250 units	19,860,000	19,860,000
Illinois: Naval Air Station: Glenview: 250 units		23,000,000
New York: Naval Station: New York: 150 units	14,900,000	14,900,000
Construction improvements	61,589,000	45,000,000
Planning	2,315,000	2,315,000
Total, construction	240,440,000	211,445,000

OPERATION, MAINTENANCE, LEASING, AND DEBT PAYMENT

The Committee has provided \$552,988,000 for operating expenses, maintenance, leasing, and debt reduction, a reduction of \$2,000,000 from the budget request.

Public Works Center, San Francisco, CA.—The Committee has deferred family housing in San Francisco until the location for homeporting the U.S.S. *Missouri* is resolved. The Committee believes the requirement for the requested number of units will be diminished if the San Francisco homeport initiative is canceled.

Debt Payment Program.—The Committee has included a legislative provision which allows not to exceed \$50,000 to liquidate obligations in-

curred for debt payment during fiscal year 1987. A fiscal year 1986 debt payment overobligation problem was resolved last year by allowing the transfer of fiscal year 1988 family housing, Navy operations and maintenance funds into the fiscal year 1986 "Debt payment" account. A similar provision is necessary this year to resolve a fiscal year 1987 problem. For fiscal year 1988 and out-years, legislation now exists to permit reprogramming from the current year "Operations and maintenance" account to the current year debt account.

FAMILY HOUSING, AIR FORCE

Fiscal year 1988 appropriation (adjusted)	\$829,593,000
Fiscal year 1989 request	922,966,000
House allowance	937,451,000
Committee recommendation	867,266,000

The Committee recommends \$867,266,000 for family housing, Air Force in fiscal year 1989 which is \$55,700,000 below the budget request and \$70,185,000 below the House recommendation. Specific details are included in the tables at the end of the report.

NEW CONSTRUCTION

The Committee has approved funding new construction totaling \$132,000,000 of family housing units for the Air Force as follows:

Location/project	Requested	Recommended
New construction:		
Philippines: Clark Air Force Base: 260 units	\$19,920,000	
Construction improvements	154,280,000	\$125,000,000
Planning	7,000,000	7,000,000
Total, construction	181,200,000	132,000,000

OPERATION, MAINTENANCE, LEASING, AND DEBT PAYMENT

The Committee has provided \$735,266,000 for operating expenses, maintenance, leasing, and debt reduction, a reduction of \$6,500,000 from the budget request.

Clark AFB, Philippines.—The Committee has denied funding for additional family housing units in the Philippines. A discussion of this issue is included under the section of the report entitled "Base rights and base access."

District of Columbia, general officers quarters.—The Committee has denied the request to provide \$515,000 for improvements to one set of general officers quarters at Bolling Air Force Base. The Committee believes such costs represent excessive expenditures.

Air Force family housing, Japan.—The Committee has been advised by the General Accounting Office that the "Air Force family housing operation and maintenance" account is overestimated by \$3,500,000 due to the recent decision of the Japanese Government to increase its share of overseas labor costs. The Committee has adjusted the "Air Force family housing" account accordingly.

FAMILY HOUSING, DEFENSE AGENCIES

Fiscal year 1988 appropriation (adjusted)	\$20,700,000
Fiscal year 1989 request	20,700,000
House allowance	20,700,000
Committee recommendation	20,700,000

The Committee recommends \$20,700,000 for family housing, Defense Agencies in fiscal year 1989 the same as the budget request and the House. Specific details are included in the tables at the end of the report.

CONSTRUCTION

The Committee has approved \$400,000 for the construction of new housing at a classified location and has provided \$113,000 for construction improvements.

OPERATIONS, MAINTENANCE, AND LEASING

The Committee has provided \$20,187,000 for these accounts, the same as the budget request.

HOMEOWNERS ASSISTANCE FUND

Fiscal year 1988 appropriation	\$2,000,000
Fiscal year 1989 request	2,000,000
House allowance	2,000,000
Committee recommendation	2,000,000

The Committee recommends \$2,000,000 to be appropriated for the Homeowners Assistance Fund, the same as the budget request.

GENERAL PROVISIONS

The Committee has made no changes to sections 101-123 and 125 as recommended by the House. Other changes are as follows:

Section 124. The Committee agrees with the House provision permitting the practice of split-funding. However, the Committee has added language to indicate that the provision applies only during fiscal year 1989. The provision now reads as follows:

SEC. 124. Notwithstanding any other provision of law, any funds appropriated to a military department or defense agency for the construction of military projects may be obligated for a military construction project or contract, or for any portion of such a project or contract, at any time before the end of the fourth fiscal year after the fiscal year for which funds for such project were appropriated if the funds obligated for such project (1) are obligated from funds available for military construction projects, and (2) do not exceed the amount appropriated for such project, plus any amount by which the cost of such project is increased pursuant to law: *Provided, That this section shall be applicable only during fiscal year 1989.*

COMMITTEE RECOMMENDED PROVISIONS

Section 126. The Committee has deleted section 126 as recommended by the House and included this provision to deny the use of funds in this act from being used for contract cleaning of family housing. The text of the provision is as follows:

SEC. 126. None of the funds appropriated in this Act for operations and maintenance of family housing may be used for contract cleaning of family housing units.

Section 127. The Committee has included this provision to deny the use of funds in this act from being used to expand accompanied tours in South Korea. The text of the provision is as follows:

SEC. 127. None of the funds appropriated in this Act may be used for the design, construction, operation or maintenance of new family housing units in the Republic of Korea: Provided, That funds may be utilized for operations, maintenance, and improvements of only those units already built or under construction by June 6, 1988.

Section 128. The Committee has included this provision to prevent the obligation of funds in this act to contractors from countries which permit untied, general purpose loans to the Soviet Union and her allies. The text of the provision is as follows:

SEC. 128. None of the funds appropriated in this act for military construction overseas may be obligated for payments to foreign contractors from countries which permit their national banking institutions to make untied, general purpose loans to the Soviet Union, Warsaw pact nations, Cuba, Vietnam, Libya, or Nicaragua: Provided, That this provision may be waived by the Secretary of Defense upon certification to the Committees on Appropriations of the Senate and House of Representatives that individual projects are vital to the security of the United States.

Section 129. The Committee has included this provision which prevents funds in this act from being utilized to transfer functions from Edgewood Arsenal, MD. The text of the provision is as follows:

SEC. 129. None of the funds appropriated in this Act may be obligated or expended for the purpose of transferring any equipment, operation, or personnel from the Edgewood Arsenal, Maryland, to any other facility during fiscal year 1989.

Section 130. The Committee has included this provision which prevents the initiation of design on the proposed Pentagon II complex. The text of the provision is as follows:

SEC. 130. None of the funds appropriated in this Act for planning and design activities may be used to initiate design of the Pentagon Annex.

Section 131. The Committee has included this provision which requires notification to the Committees on Appropriations whenever pre-mobilization construction authority is utilized. The text of the provision is as follows:

SEC. 131. Notwithstanding any other provision of law, the Secretary of Defense shall notify the Committees on Appropriations within twenty-four hours after a determination by the President or the Secretary to utilize pre-mobilization construction authority.

Section 132. The Committee has included this provision which places restrictions on the expenditure of funds for construction of the National Test Facility at Falcon Air Force Station, CO. The text of the provision is as follows:

SEC. 132. None of the funds appropriated in this Act or any other Act for the National Test Facility or any other components of the National Test Facility may be used to provide any operational battle management, command, control or communications capabilities for an early deployment of a ballistic missile defense system: Provided, That the goal of the National Test Facility shall be to simulate, evaluate, and demonstrate architectures and technologies that are technically feasible, cost-effective at the margin, and survivable.

Section 133. The Committee has included this provision to deny the use of funds in this act from being used to remove or relocate the 474th Tactical Fighter Wing from Nellis AFB, NV. The text of the provision is as follows:

SEC. 133. None of the funds appropriated in this Act for use by the Department of Defense in fiscal year 1989 may be used for the purpose of the design or construction of any facilities relating, directly or indirectly, to the deactivation, relocation or transfer of any part of the 474th Tactical Fighter Wing at Nellis Air Force Base, Nevada.

Section 134. The Committee has included this provision to permit the transfer of fiscal year 1988 military construction funds to the fiscal year 1988 "RDT&E, Air Force" account.

SEC. 134. During the current fiscal year, \$19,548,000 of the funds appropriated to the appropriation "Military Construction, Defense Agencies" of the Military Construction Appropriations Act, 1988, may be transferred to the appropriation "Research, Development, Test, and Evaluation, Air Force" of the Department of Defense Appropriations Act, 1988.

Section 135. The Committee has included this provision which permits the Secretary of the Navy to utilize funds, which may become available from a court settlement, for construction of family housing units at Marine Corps Air Station, Tustin, CA. The text of the provision is as follows:

SEC. 135. Notwithstanding any other provision of law, upon final settlement of the pending Rossmoor litigation against the United States, the Secretary of the Navy (hereafter in this section referred to as the "Secretary"), is authorized to accept and use monetary consideration paid by the plaintiffs, for the purposes of constructing additional military family housing for Marine Corps Air Station, Tustin: Provided, That the Secretary may use any funds paid to the Secretary for the purpose of conducting a military construction project for not to exceed one-hundred, fifty military family housing units at Marine Corps Air Station, Tustin: Provided further, That the Secretary shall use the funds solely for the purpose of constructing military family housing at Marine Corps Air Station, Tustin. Any such funds not used for construction shall be deposited to the general fund of the Treasury within sixty months of receipt: Provided further, That the Secretary may not enter into any contract for the construction of military family housing units until after the twenty-one day period beginning on the date on which the Secretary transmits to the Committee on Armed Services and the Committee on Appropriations of the Senate and House of Representatives a report of the full details of the contract.

Section 136. The Committee has included this provision which pre-

vents the Navy from entering into agricultural leases of longer than 1 year's duration at NAS Fallon, NV. The text of the provision is as follows:

SEC. 136. None of the funds available to the Navy may be utilized by the Secretary of the Navy to initiate agricultural leases of more than one year's duration on land in and around Naval Air Station Fallon, Nevada.

COMPLIANCE WITH PARAGRAPH 7, RULE XVI, OF THE STANDING RULES OF THE SENATE

Paragraph 7 of rule XVI requires that Committee reports on general appropriations bills identify each Committee amendment to the House bill "which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session."

All projects for which appropriations are provided by the Committee are unauthorized. Specific authorization for all but the following projects are contained in the Senate-passed National Defense Authorization Act for Fiscal Year 1989, now pending in conference with the House.

Army National Guard:

Alabama:

Auburn: Armory	\$937,000
Fort McClellan: Unit training equipment site	459,000
Montgomery: Combined support maintenance shop	3,652,000
Tuskegee: Armory	651,000

Arkansas: Stuttgart: Armory

936,000

Florida: Camp Blanding: Bachelor officer quarters

886,000

Michigan: Taylor County: Armory

2,353,000

Mississippi: Camp McCain: Unit training equipment site expansion/upgrade

600,000

Missouri: Jefferson City: U.S. property and fiscal officer office

2,036,000

Nevada: Stead: Aviation support facility

1,115,000

New Mexico: Las Vegas: Armory

1,313,000

North Dakota: Minot: Armory-Reserve center

7,920,000

Ohio: McConnelsville: Armory

4,669,000

Virginia: West Point: Armory

1,420,000

Wisconsin: Volk Field: ACMI range support facility

1,500,000

Worldwide unspecified: Unspecified worldwide locations:

Armory storage buildings	10,000,000
--------------------------------	------------

Indoor range modernization	15,000,000
----------------------------------	------------

Air National Guard:

Alaska: Anchorage: Kulis	3,500,000
--------------------------------	-----------

Florida: Camp Blanding: Site preparation and utilities	800,000
--	---------

Mississippi:

Allen C. Thompson Field: Aerial port training/age facility	2,000,000
--	-----------

Nevada: Reno IAP: Dispensary	250,000
------------------------------------	---------

West Virginia: Yeager Airport (Charleston): Aircraft parking ramp/holding pad

3,300,000

Wisconsin: Mitchell Field: Taxiway	2,470,000
--	-----------

COMPLIANCE WITH PARAGRAPH 12, RULE XXVI OF THE
STANDING RULES OF THE SENATE

Paragraph 12 of rule XXVI requires that Committee reports on a bill or joint resolution repealing or amending any statute or part of any statute include "(a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the committee."

In compliance with this rule, the following changes in existing law proposed to be made by the bill are shown as follows: existing law to be omitted is enclosed in black brackets; new matter is printed in italic; and existing law in which no change is proposed is shown in roman.

No change in existing statutes has been proposed.
